

Sprint 4 Report

Slug Shop

Sprint Start: November 21, 2023

Sprint Completion by December 5, 2023

Actions to Stop Doing: The team needs to stop leaving items to complete till the last day of the sprint as it leaves little room for testing and debugging and it will make certain items become backlog. Otherwise the team is doing very well and tasks are being completed.

Actions to Start Doing: All team members need to attend the Scrum meetings in any shape or form, it would be the most preferable if team members would be able to attend in person as it would maximize team effort and allow for the team to prepare better. The team also needs to start communicating better as tasks get left undone as improper communication leaves team members to be confused.

Actions to Keep Doing: Team members who attend the scrum meetings need to keep showing up and completing their tasks. Those who have shown up are working well and are completing the tasks necessary in order to get a working product.

Work Completed/Not Completed: The tasks from the previous sprint were completed which included getting the front end and back end merged and working. The tasks for this spring were also completed with the functionality of update being completed and merged with the entire project. Unfortunately one of the functionality that the team was hoping to implement would be getting ratings accomplished and was not capable of being completed.
