

## Sprint 4 Plan

### Slug Shop

Sprint Start: November 21, 2023

Sprint Completion by December 5, 2023

Goal: The goal of this sprint is to be able to update information in the listings and the user profile along with changing the listing state. We want to be able to also delete a listing. This sprint will also be used in order to make sure that the front end and the back end are working properly

User Story 1: As a user, I would like to be able to update my listings.

- On Listings page for the seller, there should be a button to edit the listing information\*3 hours
- The Backend needs to be able to handle calls from the frontend to the database\*2 hours
- The Database need to be able to update listing in question and store new information\*3 hours

User Story 2: As a user, I would like to be able to update my profile information.

- On the users profile page, there should be a button to edit user information where the user can change information \* 2 hours
- The Backend should be able to field these calls and send over the correct request to the database \*2 hours
- The Database should be able to handle all changes to the user information \*1 hour

User Story 3: As a seller, I would like to mark my listings as sold when I sell them.

- On Listings page for the seller, there should be a button to mark the listing as sold\*1 hours
- The Backend needs to be able to handle calls from the frontend to the database\*1 hours
- The Database need to be able to update listing in question and mark it as sold\*1 hours

User Story 4: As a seller, I would like to be able to delete my listings.

- On Listings page for the seller, there should be a button to delete the listing\*2 hours
- The Backend needs to be able to handle the call to delete the listing and return a confirmation of deletion when completed\*1 hours
- The Database need to be able to delete the listing \* 1 hour
