Sprint Plan #2
SlugShop
10/25/23 - 11/06/23

Goal: The goal of this sprint is to finish and have a working UI Front-End of the project. We are going to need to implement all the pages for the front-end including the home page, profile page, and the individual listings pages. We also want to finish integrating the database with the server as well as finish many functionalities for the back-end before merging them in sprint 3.

User Stories:

As a user I want to have a good looking home page, and to see other people's listings.
- Front-End pages should all be completed (mainly home page) 3* hours
- Home page should have a navbar with functional buttons. *2 hours
- Home page listings should redirect you to the listings page. *3 hours

As a buyer, I want to clearly see the name tags, prices, and info about each listing.
- Each listing on the home page should include data from the database. *3 hours
- The json needs to be formatted on the home page to match the data. *3 hours
- Back-End needs to be able to handle the requests from the front-end to retrieve the data. *3 hours

Team Roles:

Danny: Front-End Developer, Scrum Master
Michael: Front-End Developer
Jodh: Back-End Developer, Product Owner
Matthew: Back-End Developer
Greg: Database Developer
