Sprint #3 Report
SlugShop
11/08/23-11/21/23

Actions to stop doing: Teammates are on a good track and there is nothing that we intend on stopping.

Actions to start doing: Teammates should start attending scrum meetings because even when we move the different times for the scrum meetings, some people in the group still do not attend. Teammates should also push code to GitHub more often, this way we can see how the project is going for other teammates.

Actions to keep doing: Teammates that attend the Scrum meetings should continue to attend. This allows us to come up with strategies on how we are going to complete the project.

Work Completed/Not Completed: Due to the conflicting and complicated schedules that we have, we have not been able to complete many of the different tasks of the sprint.

-The Front-End Ui (Individual, Front page, etc.) are still not completed.
-We have not established the Docker container.
-We also have not done stress testing.
-We have not gotten any outside feedback.
